Depression: A Common Mental Disorder

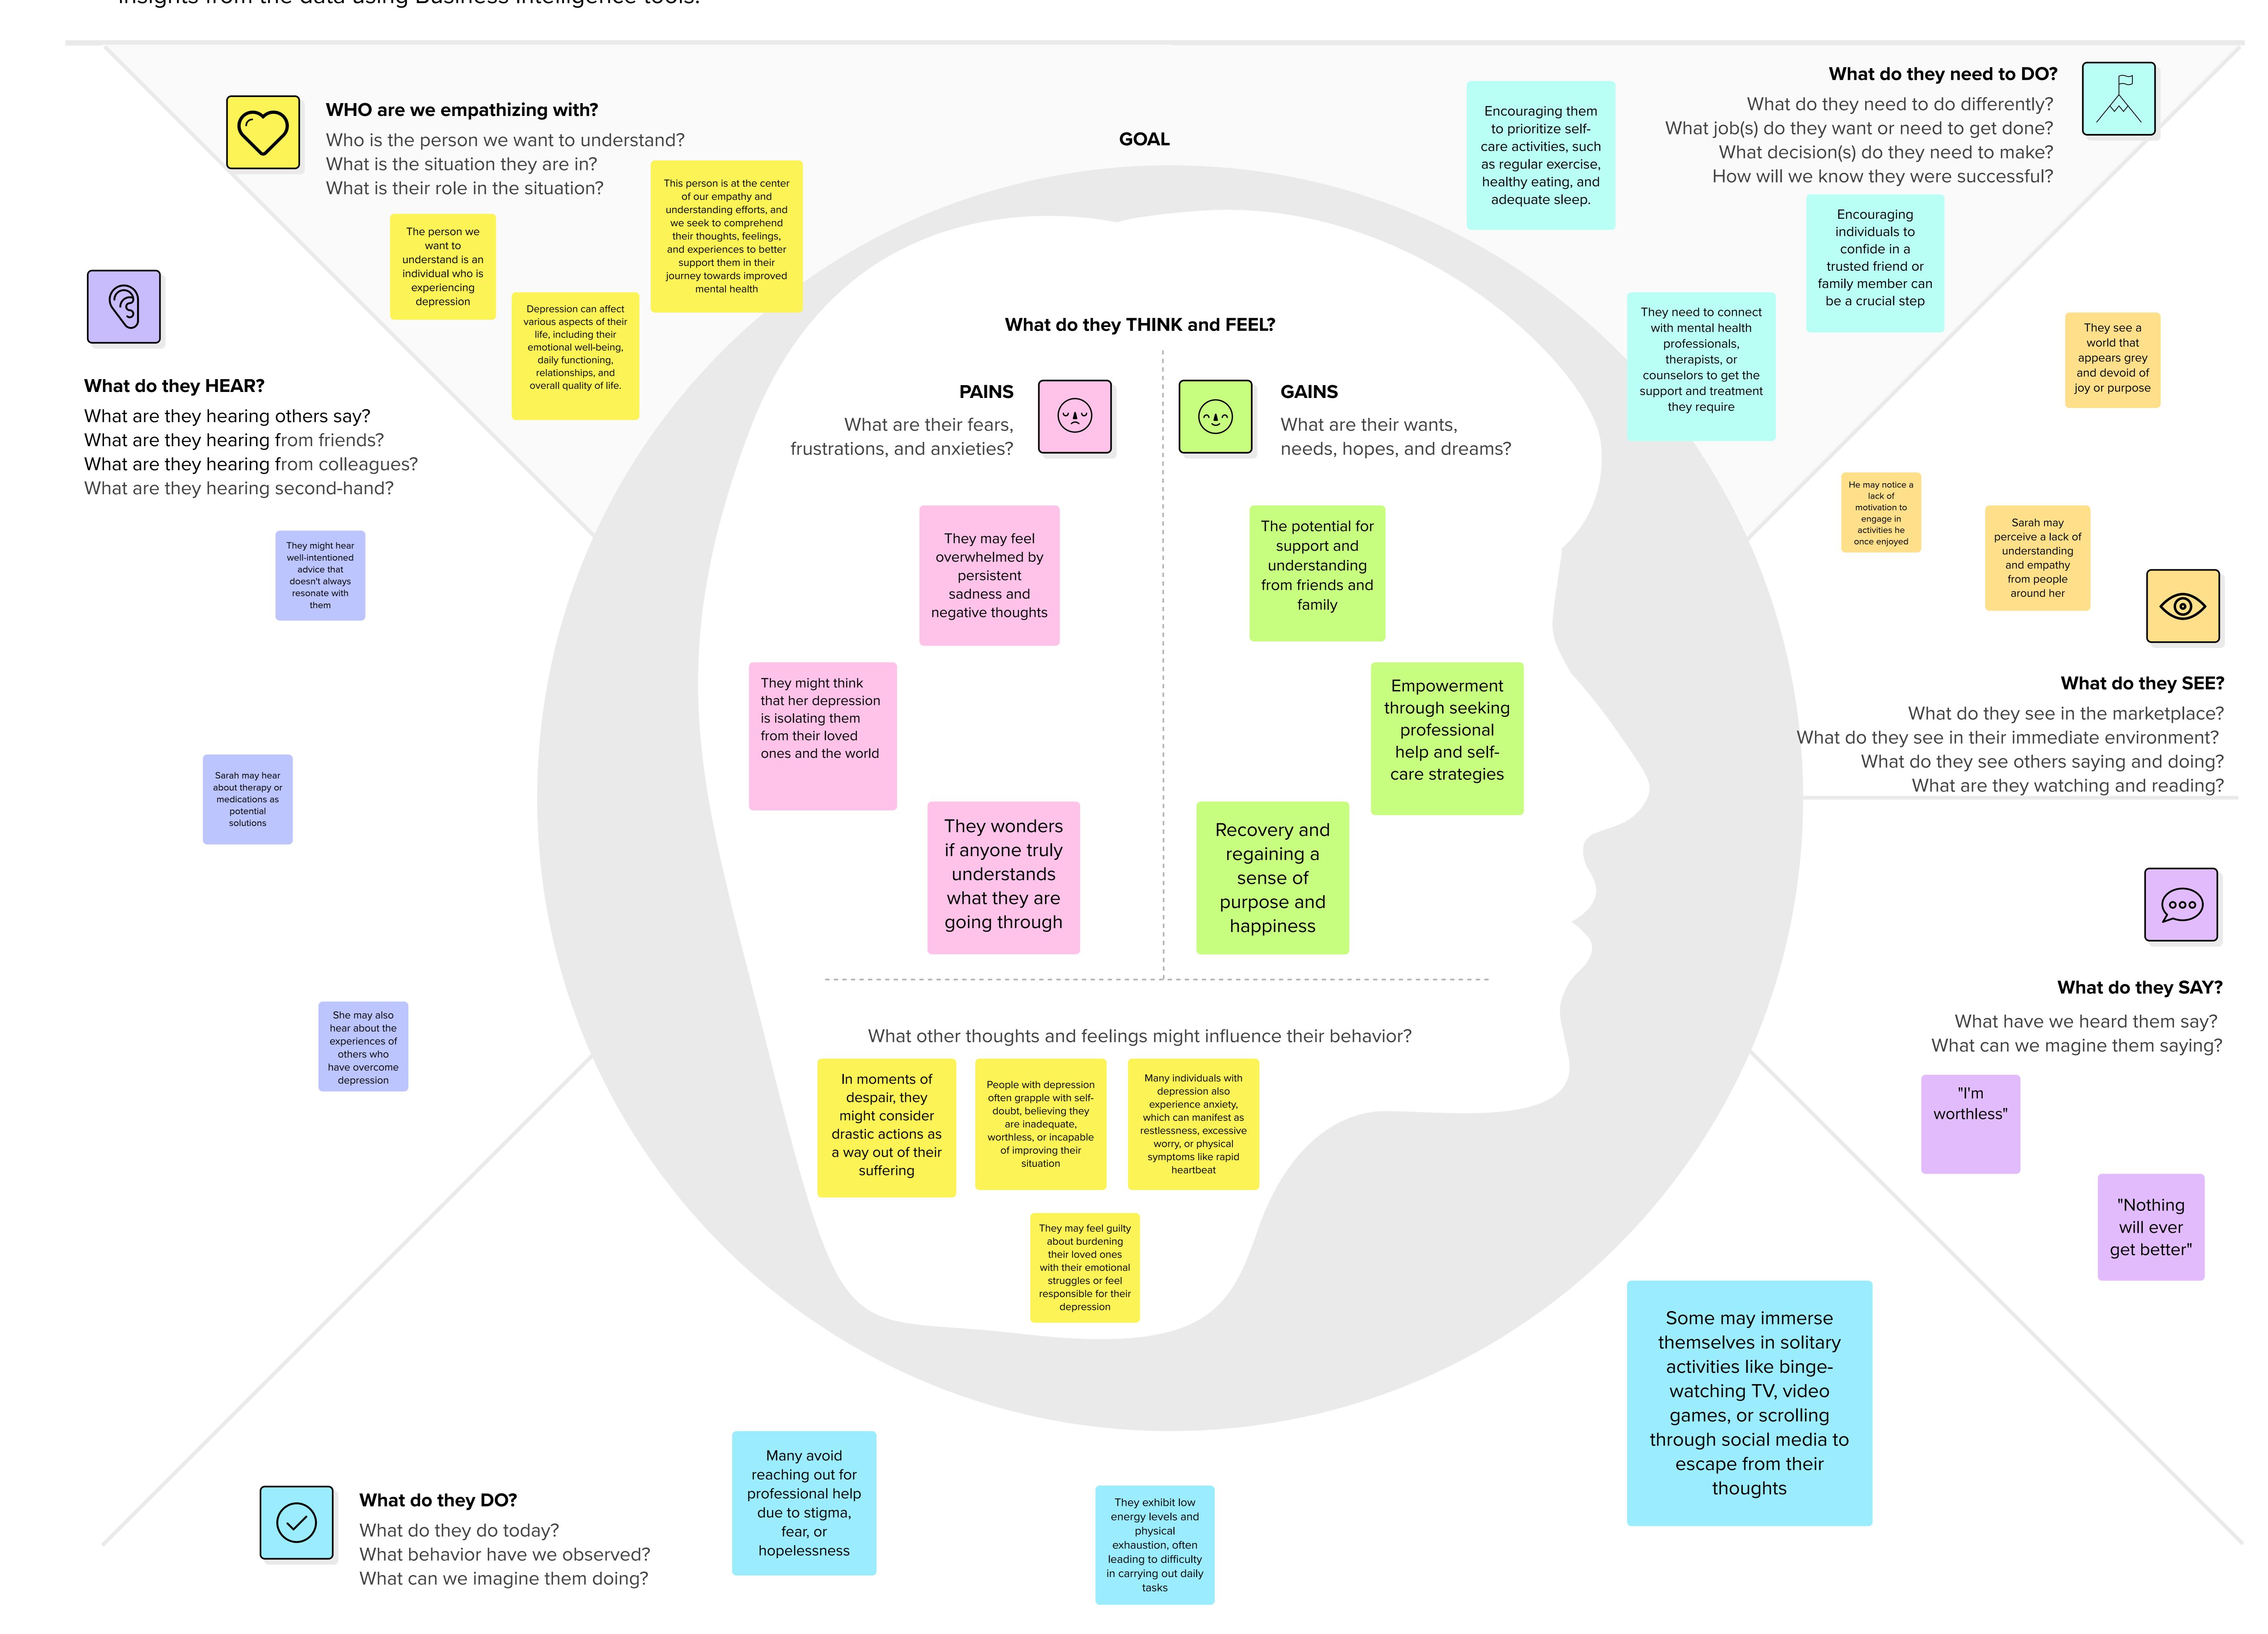

Originally created by Dave Gray at

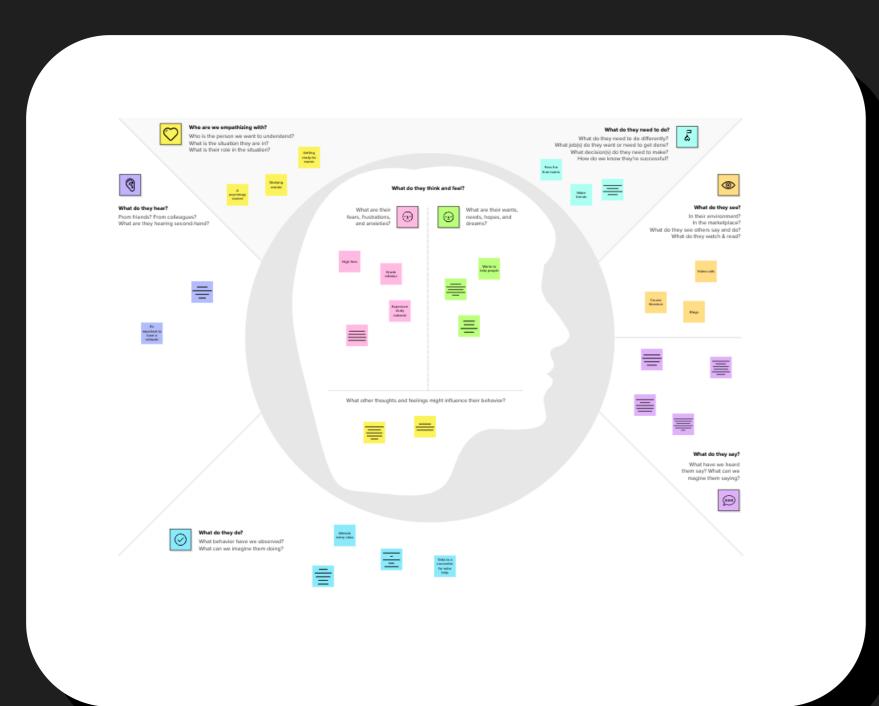

Share template feedback

This mental disorder is common and the percentage of people suffering from depression varies according to countries. depression is a widespread mental health issue that affects millions of people worldwide. While it can have a profound impact on individuals and society, it is treatable and manageable with appropriate interventions. Increasing awareness, reducing stigma, improving access to care, and advancing research are critical steps in addressing depression as a common mental disorder. In this project we are trying to analyze the depression data for different countries and extract some insights from the data using Business Intelligence tools.
