Project Design Phase-I
Solution Architecture

Date	16 October 2023
Team ID	
Project Name	Depression: A Common Mental Disorder
Maximum Marks	4 Marks

Solution Architecture:

The solution involves preprocessing and cleaning the data to refine it for predictions and future use.

Our solution utilises Business Intelligence tools, such as Tableau, to provide insights and predictions related to the issue of depression. This is achieved through visualisations and analysis of the dataset.

- Data collection
- Data preprocessing
- Data storage in Tableau
- Data analysis
- Data Visualisation
- Insights
